Application of this creamy lipstick is pleasant and easy as it glides smoothly onto the lips and provides extra rich pay-off from the first coat. The semi-matte nude color is perfectly suited for every occasion.

Procedure

Melt all ingredients at 90-95 °C. Add phase B and homogenize shortly. Add phase C under stirring. Cool to 85 °C and mold. If you prefer to use pure pigment split the dispersion to 50 % pure pigment and 50 % isononyl isononanoate. Add isononyl isononanoate to phase A. Mix pigments with a part of phase A and grind by using a mill.
